

Roach Eradicating Powder

	%/wt.
Sodium Fluoride	60
Wheat Flour	20
Corn Starch	12
Cocoa	8

Proc.: The sodium fluoride should be in a finely powdered form and thoroughly mixed and then sifted to make certain of a homogeneous product. This may be made into a paste with a minimum of water and placed in new or used crown caps, allowed to dry and laid in roach infested places. It may also be dusted as a powder. The filled caps, however, can be used over again and are cleaned up more readily than the powder.

Roach Poison, Young

	pts./wt.
Calcium Sulfate Hemihydrate	50.00
Wheat Flour	50.00
Butter or Vegetable Oil	0.25

Proc.: Mix the ingredients together.

Household Insecticide
(For roaches)

I
